

Split Air Conditioning System with Ducted Indoor Unit

This air conditioning system is a split type, featuring both an outdoor and ducted indoor unit. It is suitable for providing efficient and discreet climate control in residential or commercial environments.

Product Overview

Professional Climate Control

This split air conditioning system features a high-efficiency outdoor unit paired with a concealed indoor duct unit. Designed for seamless integration into residential or commercial infrastructure, it provides discreet and effective climate control. The ducted configuration allows for even air distribution through vents, ensuring consistent comfort across multiple spaces.
