

Split Core Current Transformer 1000/5A Class 1.0

This split core current transformer is designed for easy installation in circuit systems and networks. Its casting materials are made from high extinguishing PA66 and complies with IEC6004-1, BS7626, VDE0414-44-1, and UI94 standards.

Overview

Product Overview

This split-core current transformer is engineered for seamless integration into existing circuit systems and networks. Its design prioritizes ease of installation, allowing for retrofitting without the need to disconnect existing cables. Constructed from high-extinguishing PA66 material, this unit ensures safety and durability in demanding low-voltage power environments.
