

Split Core Current Transformer 1000A 2000A 3000A

This split core current transformer is designed for easy installation in circuit systems and networks. It accurately measures AC currents with current ratings available from 1000A to 3000A.

Product Overview

Designed for Efficiency and Ease

The NDP split core current transformer is engineered for seamless installation within existing circuit systems and networks. An evolution of the DP model, this unit features high-extinguishing PA66 casting materials to ensure durability and safety. It is fully compliant with international standards, making it a reliable choice for industrial and commercial electrical monitoring applications.

Technical Specifications

Available Current Ratings

- 1000
- 2000
- 3000

Compliance Standards

IEC6004-1, BS7626, VDE0414-44-1, UI94

Casting Material

High extinguishing PA66

Applications

Recommended Applications

Power Monitoring • Control Systems • Energy Management

Key Features

Transformer Type

Split Core / Window Type

Installation

Yes
