

Split Pillow Block Bearing Housing

This split pillow block bearing housing is designed for demanding industrial applications. The housing accommodates spherical roller bearings or self-aligning ball bearings, providing support and protection.

Product Overview

Robust Split Pillow Block Housing

The SAF 22532 split pillow block bearing housing is engineered for demanding industrial environments where durability and ease of maintenance are critical. Its split design significantly reduces downtime by simplifying the installation and inspection of bearings. Built for reliability, this housing provides essential support and protection for spherical roller or self-aligning ball bearings in heavy-duty machinery.

Compatibility and Technical Data

Compatible Bearings	22232 CCK/W33
Mounting Method	Adapter sleeve mounted on shaft

Product Features

Key Features	Split housing design, Grease fitting included, Cast iron construction, Mounting holes for secure attachment
--------------	---

Applications

Suitable Applications

- Conveyor systems
- Industrial fans
- Heavy-duty machinery
