

Split System Air Conditioner

This split system air conditioner provides efficient cooling for indoor environments. It is designed for residential and commercial use, ensuring a comfortable atmosphere.

Product Overview

Efficient Cooling Solutions

This split system air conditioner is designed for reliable performance in various environments. The unit features a robust outdoor heat exchanger with a large integrated fan to ensure optimal thermal management. Built for durability and ease of transport, these units are suitable for bulk distribution and professional installation.

Key Features

System Type

Split System • Outdoor Unit

Manufacturing & Logistics

Shipping Format

Palletized for bulk transport

Production Capability

Mass Production, Industrial Grade, Export Ready

Design Specifications

Cooling Components

- Large diameter axial fan
- High-efficiency heat exchange coil
- Protective outer casing

Unit Color

White
