

# Split-System Air Conditioner with Remote Control

This split-system air conditioner is designed for both residential and commercial use. It includes an indoor cooling unit and an outdoor heat dissipation unit, controlled by a remote.

## Overview

### High-Efficiency Climate Control

This split-system air conditioner is engineered for both residential and commercial applications, providing reliable temperature regulation. The system features a distinct indoor unit for cooling and an outdoor unit for efficient heat dissipation. Designed with advanced filtration and energy-saving technology, it ensures superior air quality and optimal comfort while maintaining low power consumption.

## Technical Specifications

System Design	Split-System
Control Interface	Remote Control
Installation	Professional Setup Required, Refrigerant Line Connection, Electrical Wiring

## Key Features

### Performance Highlights

**1 High**

Energy Efficiency

**1 Quiet**

Operation

### Environmental Standards

Eco-Friendly Refrigerant • Advanced Filtration
