

Split-Type Air Conditioner System

This split-type air conditioner system is designed for cooling and dehumidifying indoor spaces. It includes an indoor unit, an outdoor unit, a remote control, and connecting accessories for climate control in residential or commercial settings.

Overview

Professional Climate Control Solution

This split-type air conditioner system is engineered for efficient climate control in both residential and commercial environments. The system includes a sleek wall-mounted indoor unit designed for optimal airflow distribution and a robust outdoor unit equipped with a high-performance compressor. It provides versatile functionality, including effective cooling and dehumidification to maintain a comfortable indoor atmosphere.
