

Split-Type Air Conditioning System

This split-type air conditioning system consists of an indoor unit and an outdoor unit. It also includes a remote control for convenient temperature and mode adjustments.

Overview

High-Performance Split-Type Air Conditioning

This split-type air conditioning system provides a comprehensive cooling solution for professional and residential environments. The system includes a sleek floor-standing indoor unit with vertical grilles and a digital display for easy monitoring. Accompanied by a durable outdoor unit and a full-featured remote control, it offers precise temperature management and reliable performance.
