

Split-Type Single Phase Energy Meter

This split-mounted single-phase meter is designed for precise energy consumption measurement in homes and businesses. It features a digital display for easy reading of kilowatt-hour (kWh) readings, voltage, and current.

Product Overview

Professional Energy Measurement

This split-type single-phase energy meter offers a versatile solution for residential and light commercial power monitoring. The split design separates the display unit from the measurement module, providing superior installation flexibility for compact spaces. Engineered for reliability, it features a digital interface for precise kWh, voltage, and current readings while maintaining compliance with international standards.

Technical Specifications

Rated Voltage	230 V
Current Rating	5(60)A
Frequency	50 Hz
Maximum Frequency	60 Hz

Features & Compliance

Compliance

IEC Compliant

Key Features

Split-type design, DIN rail mountable, Digital display, Reset functionality

Performance Metrics

Measurement Capabilities

0 kWh Energy Consumption	230 V Voltage	60 A Current
