

Splitting Maul with Fiberglass Handle

This splitting maul is designed for splitting firewood and logs with ease and efficiency. It features a heavy maul head made of hardened steel, providing maximum splitting power.

Product Overview

Professional Splitting Maul

This splitting maul is engineered for high-efficiency firewood and log splitting. Featuring a heavy-duty hardened steel head, it delivers maximum impact force for demanding tasks. The durable fiberglass handle is designed to minimize user fatigue, ensuring a secure and comfortable grip during extended operation.

Technical Specifications

Handle Material	Fiberglass
Head Material	Hardened Steel
Primary Applications	Firewood Splitting, Log Splitting, Forestry, Farming

Key Features

Safety & Design

- Secure head-to-handle attachment
- Ergonomic grip for reduced fatigue
- Durable construction for longevity

Target Users

Homeowners • Farmers • Professional Users
