

Splitting Maul with Forged Steel Head

This splitting maul is designed for splitting logs and firewood. It features a wide, wedge-shaped blade and a pre-drilled eye for handle installation.

Product Overview

Professional Grade Splitting Maul

This heavy-duty splitting maul head is engineered for demanding wood-splitting tasks, making it an essential tool for both professional forestry work and home firewood preparation. Constructed from high-quality forged steel, it offers exceptional durability and impact resistance for long-lasting performance. The design features a specialized wide, wedge-shaped blade that maximizes splitting efficiency with every strike.

Technical Specifications

Material	Forged Steel
Primary Application	Log Splitting, Firewood Preparation, Forestry

Design Features

Head Design	Wide, wedge-shaped blade for efficient splitting
Assembly Readiness	Yes
Mounting	Pre-drilled eye for easy handle installation
