

Splitting Maul with Wooden Handle

This splitting maul is designed for splitting logs and firewood. It features a heavy, forged steel head for maximum splitting power and a durable wooden handle for a comfortable grip and reduced vibration.

Product Overview

Professional Splitting Maul

This splitting maul is specifically engineered for efficient log and firewood processing. Featuring a heavy, forged steel head, it delivers maximum splitting power for tough wood applications. The inclusion of a durable wooden handle ensures a comfortable grip while effectively reducing vibration during heavy-duty use.

Technical Specifications

Head Material	Forged Steel
Handle Material	Wood

Usage & Application

User Suitability

Occasional Use • Frequent Use

Primary Application	Log Splitting, Firewood Preparation
