

Spoked Motorcycle Wheel Assembly

Motorcycle wheel assembly features a spoked design connecting a metal rim to a central hub. The hub contains integrated bearings to ensure smooth rotation during motorcycle operation.

Product Overview

Professional Motorcycle Spoked Wheel Assembly

This high-quality spoked motorcycle wheel assembly is designed to provide durability and consistent performance for a variety of motorcycle applications. It features a robust metal rim connected to a central hub via a precise spoke configuration, ensuring structural integrity under road conditions. The assembly includes an integrated metal hub equipped with bearings to facilitate smooth, reliable rotation.

Construction

Design Type	Spoked
Material	Metal Rim, Metal Hub

Mechanical Components

Rotation Mechanism

- Integrated bearings
- Central hub assembly
- Spoke tension interface
