

Sponge Abrasive Block

This multi-functional abrasive block is made with aluminum oxide or silicon carbide and a sponge or EVA middle. It is designed for grinding most materials and features four or double-sided sand-planting for good softness.

Product Overview

Versatile Sanding Solution

This professional-grade sponge abrasive block is designed for superior sanding performance across a variety of materials, including wood, paint, metal, and plastic. The block is highly durable and supports both wet and dry sanding applications for maximum flexibility. Its reusable nature ensures efficiency, making it an ideal choice for high-quality finishing in demanding B2B applications.

Technical Specifications

Available Sizes (mm)

- 100 x 70 x 25
- 125 x 100 x 12

Available Grits

36, 40, 50, 60, 80, 100, 120, 150, 180, 220

Usage Information

Key Application Features

Wet or Dry Use • Reusable • Multi-Material Compatibility
