Product Overview

High-Efficiency Scouring Pad Production

The QDW04 Sponge Scouring Pad Weaving Machine is a specialized industrial solution designed for the automated production of high-quality scouring materials. Built for reliability, this system integrates precise needle mechanics and robust power components to ensure consistent output. It is an ideal choice for manufacturers looking to streamline their abrasive cleaning material production lines.

Model

QDW04

Technical Performance

Production Capacity

0.9 kg/hour

Output

108 pcs

Needle Quantity

Power Specifications

Component	Power Rating
Master Machine	0.55
Wire Metal Press Machine	0.55

Operating Voltage

220v

Machine Dimensions

Physical Dimensions

- Master machine: 0.8m x 0.6m x 1.6m
- Wire metal press machine: 0.45m x 0.5m x 1.25m
