Product Overview

High-Efficiency Rotary Filling & Capping

This automated rotary machine is engineered for the high-speed processing of pre-made stand-up pouches with spouts. Capable of handling both corner and center-spouted designs, it ensures precise filling and secure capping for a wide range of liquid and semi-liquid products. Its robust stainless steel construction guarantees hygiene and durability, making it an ideal solution for food, beverage, and chemical packaging lines.

Performance Metrics

Production Output

45 pouches/min
Capacity

Filling Volume Range

1000-4000ml

Technical Specifications

Filling Heads	3
Capping Heads	3
Max Pouch Width	350 mm
Minimum Spout Diameter	16 mm

Compatibility

Common Applications

- Dairy alternatives
- Sauces and beverages
- Edible oils
- Synthetic oils
- Liquid soaps and detergents
- Shampoos and lotions

Supported Pouch Types

Premade, Stand-up, Corner Spout, Center Spout
