

Spring Balancer for Tool Suspension

Spring balancers allow operators to move tools vertically with minimal effort. These heavy-duty balancers are designed for even weight distribution in industrial lifting applications.

Product Overview

Professional Tool Suspension Solutions

This spring balancer is designed to enhance efficiency in manufacturing and assembly line operations. By supporting tool weight, it allows operators to move equipment up and down with minimal effort, significantly reducing worker fatigue and safety hazards. Built with a superior spring mechanism, this unit offers a long working life with almost no maintenance required.

Technical Specifications

Load Capacity

1 kg

Minimum Capacity

400 kg

Maximum Capacity

Available Stroke Lengths

- 1.5 meters
- 3.0 meters

Operational Benefits

Key Advantages

Reduced Worker Fatigue • Improved Production Accuracy • Increased Safety • Low Maintenance • Effortless Operation
