

# Spring Balancer for Tool Suspension

This heavy-duty spring balancer is designed to suspend tools and equipment, providing ergonomic assistance and reducing operator fatigue. It is ideal for assembly lines, workstations, and various industrial applications.

## Overview

### Professional Tool Suspension Solution

This heavy-duty spring balancer is engineered to improve efficiency and operator comfort on assembly lines and industrial workstations. By allowing hand tools to hang freely, it significantly reduces user fatigue and increases productivity. Designed for longevity and safety, the unit features a robust structure with automatic lubrication for smooth performance.

## Technical Specifications

### Capacity

**3 kg**

Max Capacity

**1 kg**

Min Capacity

### Cable Length

1.5 m

### Materials

Steel, Engineered Polymers

## Performance

### Features

- Automatic lubrication
- Adjustable tension
- Safety cable included
- Ergonomic design

### Lifespan

100000 cycles

## Applications

### Recommended Industries

Automobile Assembly • Welding Works • Packaging • Manufacturing
