

Spring Balancer Retractor

The spring balancer is a hand operated tool. They feature adjustable tension settings to accommodate various tool weights, ensuring the tool remains suspended at the desired height.

Product Overview

Industrial Spring Balancer

This hand-operated spring balancer is designed to support heavy tools and equipment, significantly reducing operator fatigue in industrial environments. By providing effortless suspension, it allows workers to manage weights of up to 400 kg with ease. Its space-saving, low-profile design is ideal for facilities with limited operational area, ensuring improved workflow efficiency and ergonomics.

Technical Specifications

Maximum Capacity

400 kg

Capacity

Key Features

- Adjustable tension settings
- Low-profile, space-saving design
- Enclosed spring mechanism
- Ergonomic weight support
- Durable industrial construction

Available Weight Classes

3 kg, 5 kg, 15 kg, 22 kg, 30 kg, 60 kg, 70 kg, 100 kg, 120 kg
