Product Overview

Ergonomic Tool Suspension

The Spring Tool Balancer is designed to relieve operators from the physical burden of holding heavy hand tools, effectively creating a weightless feel. By allowing tools to be pulled down with minimal pressure, it significantly reduces worker fatigue and strain during repetitive tasks. This device is an essential addition to assembly lines, welding stations, and workshops, ensuring tools remain organized, easily accessible, and secure.

Performance

Capacity Range

1 kg

Minimum

3 kg

Maximum

Model

MCT-3KG

Features

Key Features

External Tension Adjustment, Hardened Worm Gear System, Durable Construction, Ergonomic Design

Applications

Common Industrial Applications

- Product assembly lines
- Welding stations
- Jig suspension
- General workshop tool management
