Product Overview

Industrial Ergonomic Suspension

This spring tool balancer is designed to suspend industrial tools, effectively neutralizing their weight during operation. By providing a weightless feel to the user, it significantly reduces operator fatigue and enhances overall productivity on assembly lines. The unit features robust construction with a durable housing, ensuring reliable performance in demanding factory and workshop environments.

Performance Metrics

Load Capacity Range

Minimum Load

3 kg

Maximum Load

Technical Details

Model Number	MCT-M03
Country of Origin	China

Operational Features

Key Benefits

- Reduces operator labor intensity
- Improves work efficiency
- Adjustable spring tension
- Safety mechanism to prevent accidental dropping
- Ergonomic tool maneuverability

Recommended Use	Assembly Lines, Industrial Workshops, Production Facilities
