

Spring Tool Balancer with 6kg Capacity

This spring balancer utilizes spring energy, eliminating the need for electrical or mechanical power. It is designed to keep tools suspended at a desired height, reducing operator fatigue and saving costs.

Product Overview

Industrial Spring Balancer

This spring tool balancer is designed to enhance productivity and worker safety in assembly and manufacturing environments. By utilizing spring energy, it allows heavy tools to operate with minimal effort, significantly reducing operator fatigue. The durable unit provides a tidy workspace and prevents damage to equipment by securely suspending tools at the desired height.

Performance Specifications

Load Capacity

6 kg

Max Load

Stroke Length

1.5 m

Power Mechanism

Spring-loaded (No electricity required)

Features

Operational Benefits

- Reduces operator fatigue
- Increases production accuracy and volume
- Prevents tools from dropping
- Keeps workstation organized
- Maintenance-free power (no electrical required)

Safety Features

Anti-drop wire rope loop, Spring energy control, Industrial grade durability

General Information

Model Type

HW-9
