

Sprocket Alignment Shims

Precision shims are designed for adjusting sprocket alignment. These shims provide accurate spacing to ensure optimal performance in machinery and manufacturing applications.

Product Overview

Precision Alignment Solutions

These precision-engineered shims are essential for ensuring accurate sprocket alignment in demanding machinery and industrial systems. By providing precise spacing, they help optimize system performance and reduce mechanical wear. Designed for professional manufacturing and repair applications, our shim range accommodates a wide variety of clearance requirements.

Technical Specifications

Available Thicknesses

- 0.001"
- 0.002"
- 0.003"
- 0.004"
- 0.005"
- 0.006"
- 0.007"
- 0.008"
- 0.009"
- 0.010"
- 0.012"
- 0.015"
- 0.020"

Application

Primary Applications

Machinery, Manufacturing, Industrial Repair, Sprocket Alignment
