

Square Axial Fan for Textile Machinery

Square axial fan designed for cooling applications in machinery and industrial equipment. The fan blades are optimized for efficient airflow and quiet operation.

Product Overview

High-Efficiency Cooling Solution

This square axial fan is precision-engineered for cooling applications within demanding industrial environments. Featuring a durable frame design with integrated mounting holes, it ensures straightforward installation and long-term stability. The blades are specifically optimized to deliver reliable airflow while maintaining quiet operation, making it an ideal choice for apparel and textile machinery requiring consistent thermal management.

Key Features

Design Highlights

- Square frame geometry
- Integrated mounting holes for easy installation
- Optimized blade profile for airflow efficiency
- Low-noise operation profile

Primary Applications

Textile Machinery, Apparel Manufacturing, Industrial Equipment Cooling

Performance

Operational Focus

1 High

Airflow Optimization

1 Low

Noise Level
