

Square Electric Non-Stick Frying Pan with Glass Lid

This square electric frying pan features a non-stick coating for easy cooking and cleanup. It is equipped with integrated handles, a detachable base, and a transparent glass lid.

Product Overview

Professional Electric Cooking Solution

The TXG-031 square electric frying pan is designed for versatile culinary applications in professional and commercial settings. Featuring a durable non-stick coating and an integrated design, it offers consistent heating and easy food release. The inclusion of a transparent glass lid ensures efficient heat retention and visibility during the cooking process.
