

Square Frame Axial Fan for Textile Machinery

Axial fan with a square frame, designed for cooling applications in machinery and industrial settings. It is specifically suitable for apparel and textile machinery.

Product Overview

High-Performance Cooling for Textile Machinery

This square frame axial fan is specifically engineered for cooling applications within textile and apparel machinery. Featuring a robust black plastic construction with a five-blade design, it ensures efficient airflow and reliable performance in demanding industrial environments. Its square frame geometry allows for seamless mounting and integration into various machine systems, making it an essential component for maintaining optimal operating temperatures.

Technical Specifications

Frame Design	Square Frame
Material	Black Plastic
Blade Count	5

Application

Installation

- Square frame for easy integration
- Designed for machinery mounting

Primary Application	Textile Machinery, Apparel Machinery, Industrial Cooling
---------------------	--
