Product Overview

Industrial Ventilation Solution

The Square Frame Industrial Exhaust Fan is engineered for high-efficiency air circulation and ventilation in demanding environments. Featuring a CAD-optimized blade design, this unit delivers stable, high-volume airflow while maintaining low noise levels and efficient operation. Its robust construction includes a pure copper motor and a protective shutter system, making it a dependable choice for schools, hotels, workshops, and residential spaces requiring effective air exhaust and dust removal.

Technical Specifications

Motor Type	Pure Copper
Bearing Type	Low Noise Rolling Bearing

Performance Features

Performance Highlights

1 High Airflow Efficiency	1 Low Noise Level
-------------------------------------	-----------------------------

Design & Construction

Design Advantages

- CAD optimized blade design
- Square frame for easy installation
- Integrated shutter for wind and rain protection
- Low temperature-rising operation

Applications

Primary Functions

Ventilation • Exhaust • Detoxicating • Dedusting

Ideal For

Schools, Hotels, Residential, Workshops, Kitchens
