

Square Frame Ventilation Fan

This electrical fan is designed for both ventilation and exhaust purposes. Its square frame provides structural support, while the aerodynamically shaped blades ensure efficient airflow.

Overview

High-Efficiency Ventilation Solution

This square frame ventilation fan is engineered for optimal air circulation in enclosed spaces such as offices and residential environments. Featuring a robust four-blade design with aerodynamically shaped blades, it ensures consistent and reliable airflow performance. The durable construction provides long-lasting operation, making it an ideal choice for effective exhaust and air quality management.

Technical Specifications

Blade Configuration	4-Blade Design
Frame Shape	Square with rounded corners

Application

Primary Function	Ventilation • Exhaust
Suitable Environments	Residential, Office, Enclosed Spaces
