

# Square Hand Sanding Pad with Locking System

This hand sanding pad features a square shape for precise corner and edge sanding. It is equipped with a locking system that securely holds sandpaper, preventing slippage during manual applications.

## ADDITIONAL IMAGES

## Product Overview

### Professional Manual Sanding Solution

This manual sanding block features an integrated locking mechanism designed to hold sandpaper firmly in place, ensuring precision and preventing slippage during operation. Engineered for versatility, it is suitable for a wide range of industries including automotive refinishing, woodworking, and precision surface preparation. The durable construction provides consistent performance when paired with polishing pastes or powders for a high-quality finish.
