Product Overview

High-Efficiency Square Baler

The 9YFQ-1900 is a professional-grade square baler engineered for superior harvesting productivity. Featuring a wide pickup width and an advanced straight-line straw transport system, it maximizes throughput while protecting delicate crops like alfalfa. Its symmetric design ensures excellent driving stability and maneuverability, even in small or irregular field plots.

Key Features

Why Choose This Baler

- Imported German knotting and transmission system
- Wide 1.95m low flat elastic tooth roller pickup
- Straight-line straw transport for increased piston frequency
- Symmetric longitudinal axis for towing stability
- High ground clearance for improved terrain adaptability
