

Square Industrial Heater

This square industrial heater is designed for robust performance and efficient heating in various environments. It is ideal for workshops, garages, and construction sites.

Product Overview

Industrial-Grade Performance

The IFH02-150-M square industrial heater is engineered for robust performance and efficient heating in demanding environments. Featuring a durable metal casing and protective front grill, it is built to withstand the rigors of workshops, garages, and construction sites. The unit includes adjustable thermostat controls for precise temperature management and integrated handles for convenient portability.

Technical Specifications

Rated Power

15000 W
Power Output

Electrical Input

400V 3N~ 50-60Hz

Features & Safety

Safety Compliance

Protective Grill, Warning Labeling, Stable Base

Temperature Control

Adjustable thermostat
