

# Square LED Panel Light

Square LED panel light delivers uniform illumination with its array of surface-mount LEDs. It is designed for applications like ceiling lights and area lighting, featuring a central white plastic housing.

## Product Overview

### Square LED Panel Light

This square-shaped LED panel light is engineered for uniform illumination, utilizing a dense array of surface-mount LEDs. Designed for versatility, it is suitable for various lighting applications, including ceiling installations and general area lighting. The unit features a robust central housing, optimized for electrical connections and efficient heat dissipation.

## Technical Details

Model Identifier	192-192-11C-158-165
Light Source	Surface-mount LED array

## Design & Construction

### Housing Features

- Central white plastic housing
- Integrated heat dissipation
- Electrical connection housing

Shape	Square
