

Square Opening Iron Wire Mesh

This square iron wire mesh is constructed with precision from low carbon iron wire, ensuring uniform mesh and rust resistance. It is used across industries and construction for sieving, filtering, safety enclosures, and as a substitute for wood strips in walls and ceilings.

Product Overview

Versatile Iron Wire Mesh

This high-quality square iron wire mesh is engineered for durability and reliability across a wide range of industrial and commercial applications. The robust construction makes it an ideal solution for structural reinforcement, perimeter fencing, and protective screening. Designed for easy installation, this material provides long-lasting performance in both agricultural and construction environments.

Technical Specifications

Material Composition	Iron
Opening Geometry	Square

Key Features

Key Performance Attributes

Corrosion Resistant • Robust Construction • Easy Installation

Primary Applications	Construction, Agriculture, Industrial Fencing, Screening, Reinforcement
----------------------	---

Logistics

Supply Format	Rolls
