

Square Point Shovel with Wooden Handle

This square shovel is mainly used in agriculture, industry, and construction. It features a durable steel blade with a reinforced edge and a sturdy wooden handle.

Product Overview

Professional Grade Square Point Shovel

This heavy-duty square point shovel is engineered for reliability in demanding gardening, landscaping, and construction environments. Featuring a durable railsteel blade with a reinforced edge, it ensures efficient soil penetration and long-lasting performance. The shovel is paired with a sturdy wooden handle designed to offer optimal leverage and control for professional-grade material handling.
