

Square Point Shovel

This square point shovel is designed for digging, scooping, and moving materials. It features a durable steel blade and robust handle for enhanced strength, making it ideal for construction, landscaping, and gardening.

Product Overview

Professional Grade Square Point Shovel

This heavy-duty square point shovel is engineered for demanding tasks, including digging, scooping, and moving various construction or landscaping materials. Featuring a durable steel blade and a robust handle, it is designed for longevity and reliable performance under high-pressure conditions. The shovel includes a forward-turned step for secure footing, allowing the user to exert more force with improved leverage.
