

Square Portable Box Fan for Air Circulation

This box fan is a household electrical appliance designed for air circulation and ventilation. Its compact design allows for placement on floors, tables, or windowsills.

Overview

Compact Air Circulation Solution

The KYT-30A is a versatile box fan engineered for efficient air circulation and ventilation in indoor spaces. Featuring a robust square housing and a protective grille, it is designed to provide consistent airflow in homes, offices, and other enclosed environments. Its compact, portable form factor allows for flexible placement on floors, tables, or windowsills.
