

Square Reflector Set with Red and Orange Reflectors

This set features round reflectors arranged in a square formation, with two red and two orange reflectors. These reflectors enhance visibility and safety, especially in low-light conditions, and the orange reflectors have a textured surface to maximize light reflection.

Product Overview

High-Visibility Safety Reflectors

This set of square-configuration reflectors is designed to enhance visibility and safety for vehicles, trailers, and heavy equipment. The kit includes both red and orange reflectors, ensuring versatile application across various safety standards. With a specialized textured surface on the orange units to maximize light reflection, this set is an essential component for operations in low-light conditions.

Technical Details

Kit Contents

- 2 Red Reflectors
- 2 Orange Reflectors

Key Features

Textured Surface, Square Arrangement, High Visibility, Low-Light Optimized

Applications

Common Applications

- Commercial Vehicles
- Trailers
- Industrial Equipment
