

Square Sealing Gasket with Central Opening

This square gasket is designed for effective sealing purposes. It is constructed from a durable, flexible material, making it suitable for machinery, plumbing, and automotive applications.

Product Overview

Square Sealing Gasket with Central Opening

This square sealing gasket is engineered for high-performance sealing applications, featuring a precise central circular opening to accommodate shafts or pipes. Constructed from durable, flexible materials, it ensures a tight, reliable seal between mating surfaces to prevent leaks and contamination. Its robust design makes it an ideal choice for demanding environments in machinery, plumbing, and automotive sectors.

Physical Properties

Shape	Square
Opening Type	Central circular opening

Application

Primary Applications	Machinery, Plumbing, Automotive
----------------------	---------------------------------

Performance

Sealing Performance

Tight Seal • Leak Prevention

Material Properties

- Durable construction
- Flexible material
- Resilient for mating surfaces
