

# Square Ventilation Exhaust Fan

This square ventilation fan is designed for exhaust purposes. It is suitable for household or commercial use to improve air circulation and remove stale air.

## Product Overview

### High-Efficiency Air Circulation

This square-shaped electrical exhaust fan is engineered to provide reliable ventilation for both residential and commercial environments. Designed with a durable white plastic grill and frame, it effectively removes stale air and improves overall indoor air quality. Its compact design and robust motor housing make it an ideal solution for maintaining fresh air circulation in various spaces.
