

Square Ventilation Exhaust Fan with Louvered Frame

This square ventilation fan is designed for air extraction. It features a four-blade propeller within a louvered metallic frame for controlled airflow.

Product Overview

High-Efficiency Ventilation Solution

This square-shaped electrical exhaust fan is engineered to provide robust air circulation for both household and commercial environments. Featuring a durable four-blade propeller design, it ensures effective air extraction and consistent performance. The sturdy metallic frame includes an integrated louvered system, allowing for precise control over airflow while maintaining structural integrity.

Technical Specifications

Form Factor	Square
Blade Configuration	4
Frame Design	Louvered Metallic Frame
Suitable Applications	Residential, Commercial, Air Extraction
