

# Stackable Steel Tire Storage Rack

This stackable steel rack is designed for efficient tire storage in warehouses and industrial settings. Constructed from heavy-duty steel, it maximizes vertical storage capacity and improves inventory management.

## ADDITIONAL IMAGES

## Product Overview

### Heavy-Duty Modular Tire Storage

This stackable steel tire storage rack is engineered for high-efficiency warehouse and industrial tire management. Featuring a robust welded steel construction and a corrosion-resistant finish, the rack provides a stable, space-saving solution for automotive shops and distribution centers. Its modular, collapsible design allows for easy assembly and compact storage when not in use, helping to maximize vertical space utilization.

## Key Features

### Key Features

- Stackable design for vertical space optimization
- Collapsible frame for easy storage when empty
- Heavy-duty welded steel tubing construction
- Integrated support beams for enhanced stability
- Corrosion-resistant powder coating

## Technical Specifications

### Surface Coating Options

Yellow Finish • Blue Finish

### Material Composition

Welded Steel, Metal Tubing

## Application

### Ideal Environments

- Warehouses
- Distribution Centers
- Automotive Service Centers
- Tire Shops
