

Stacked Washer Drain Pump

This drain pump is designed for stacked washer units. It features a robust impeller and motor assembly for efficient water removal.

Product Overview

High-Performance Drain Pump

This high-performance drain pump is specifically engineered for stacked washer units, ensuring efficient and reliable water removal. It features a robust impeller and motor assembly housed in durable plastic for long-lasting operation. The compact design allows for easy installation and seamless integration into various washer models, helping to prevent water damage.

Technical Specifications

Design Features

- Robust impeller assembly
- High-performance motor
- Compact form factor

Compatibility

Various stacked models

Housing Material

Durable plastic

Application

Stacked Washer, Drainage System
