

Stage Fog Machine with DMX Control

This fog machine is designed for creating atmospheric effects in entertainment and stage lighting. It features adjustable output control and DMX-512 signal control.

Product Overview

Professional Haze Generation

This advanced stage fog machine utilizes high-pressure atomization technology, eliminating the need for a traditional heating system. This allows for immediate operation upon power-up, offering a plug-and-play experience for stage and entertainment professionals. The unit features an adjustable fan for precise haze control and is designed for quiet, reliable performance with a leak-proof bottle system.

Technical Specifications

Voltage	120V/220V 60/50Hz
Power Consumption	500 W
Fuse Rating	230V/5A, 110V/10A

Performance Metrics

Output Capacity

3000 ct.ft/min
Output

Tank Capacity	3.2 L
---------------	-------

Control & Operation

DMX Channel Functions

Channel	Function
CH1	Smoking On/Off
CH2	Adjust Wind Volume

Control Modes	Manual Control, DMX-512 Signal
---------------	--------------------------------

Physical Attributes

Packaging Dimensions	59 x 45 x 45 cm
Weight	33.5 kg

Features

Key Features

- High-pressure atomization technology
- No heating system required
- Angle adjustable fan
- Leak-proof bottle design
- Low noise operation
- Thin, quick-diffusing smoke
