

# Stage Lighting Equipment

This stage lighting equipment is designed for use in theatrical productions, concerts, and other live events. It provides illumination and creates visual effects to enhance the performance.

## Product Overview

### Professional Power Conversion

This power inverter is engineered to convert DC power from batteries into reliable AC power, making it an ideal solution for powering appliances in mobile environments like RVs or vehicles. Built with a compact and durable housing, it ensures long-lasting performance for professional applications. The unit includes integrated safety mechanisms such as overload and short-circuit protection for secure operation.

## Technical Specifications

Device Type	Power Inverter
Input Type	DC Battery
Output Type	AC Standard

## Features & Safety

### Interface Features

- Multiple AC outlets
- LED status indicators
- Dedicated on/off power switch

Safety Protections	Overload Protection, Short Circuit Protection
--------------------	---

## Construction

### Housing

Compact Design • Durable Build • Portable
