

Stainless Steel Abrasive Cutting Disc

This abrasive cutting disc is designed for stainless steel. It features high-performance abrasive grains for efficient and precise cutting.

Product Overview

High-Performance Cutting Solution

This stainless steel abrasive cutting disc is engineered for precision and durability in demanding industrial environments. Featuring high-performance abrasive grains, it ensures consistent, efficient cutting performance on stainless steel surfaces. Designed with safety and longevity in mind, this disc meets rigorous international standards to support professional-grade operations.

Technical Specifications

Abrasive Grade	27 WA24R
Maximum Operating Speed	80 m/s
Compatible Materials	Stainless Steel, INOX

Compliance & Safety

Certifications & Standards

ISO 9001 • EN12413 • MPA 99712

Safety Features

- INOX Free (Iron, Sulfur, Chlorine free)
- Compliant with EN12413 safety standards
- High technology construction for durability
