Overview

Intelligent Water Pressure Solution

This stainless steel automatic booster pump is engineered for reliable, intelligent water pressure management. Featuring integrated pressure sensors and a built-in pressure tank, it offers a seamless installation experience with low-noise operation. Designed for longevity and efficiency, this unit includes adjustable pressure settings and thermal protection, making it an ideal choice for consistent water delivery.

Key Features

Core Features

- Integrated pressure sensors
- Built-in pressure tank
- Adjustable pressure settings
- Low noise operation
- Thermal protection
- Easy installation

Performance Metrics

Performance Specifications

8 bar

Max Pressure

0.75 kW

Power Output

3450 r/min

Speed

Technical Details

Electrical Data

Parameter	Value
Voltage	220-240V
Frequency	50/60Hz
Capacitor	20 μ F/450V

Operating Environment

Max Medium Temp 60°C, Ambient Temp 50°C, IP55 Protection, Class 155(F)
