

# Stainless Steel Ball Lock Cable Tie

These cable ties are made from SUS 304 or SUS 316 stainless steel. They feature a ball lock mechanism for quick and secure fastening in a variety of environments.

## Product Overview

### High-Performance Stainless Steel Ball Lock Cable Ties

These stainless steel cable ties are engineered for robust performance in demanding environments, offering exceptional resistance to corrosion, acid, and extreme temperatures. Featuring a reliable ball-lock self-locking mechanism, they provide high tensile strength and secure fastening. Designed for versatile indoor and outdoor use, they are ideal for industrial, marine, and construction applications where durability is paramount.

## Technical Specifications

### Operating Temperature

<b>-60 °C</b> Minimum	<b>300 °C</b> Maximum
--------------------------	--------------------------

### Characteristics

Acid Resistant • Corrosion Resistant • High Tensile Strength • Self-Locking

**Material** Stainless Steel 304, Stainless Steel 316

**Package Quantity** 100 pieces/sachet

## Dimensions and Sizing

### Size Matrix

Model	Width (mm)	Thickness (mm)
TSR-4.6	4.6	0.25
TSR-7.9	7.9	0.25
TSR-10	10	0.25
TSR-12	12	0.4
TSR-15	15	0.4
