

Stainless Steel Ball Valve for Industrial Pipelines

This ball valve is designed for use in chemical and industrial pipelines, handling water, oil, gas, and other media. The valve is available in sizes ranging from 1/2" to 2", with pressure ratings up to 6.3MPa (1000PSI).

Overview

High-Performance Stainless Steel Ball Valve

This stainless steel ball valve is engineered for demanding industrial and chemical pipeline applications, offering reliable performance with water, oil, and gas media. Its robust design features a body and bonnet connection that simplifies routine maintenance and repair, ensuring long-term operational efficiency. Built to international standards, it provides a versatile solution for flow control in diverse industrial environments.

Technical Standards

Compliance Standards

ANSI B 16.34, API 598, ISO 5211

Technical Specifications

Pressure Rating

6.3 MPa
Max Pressure

1000 PSI
Max Pressure

Body Material Options

CF8 • CF8M • CF3M

Compatible Media

- Water
- Oil
- Gas
