

# Stainless Steel Cable Anchor Bracket

This stainless steel anchor bracket is designed for securing service lines. It is used with FHA or PA tension clamps.

## ADDITIONAL IMAGES

## Overview

### Reliable Cable Anchoring Solution

The CAB25 stainless steel anchor bracket is a high-performance component specifically designed for securing service lines in electrical power distribution. Constructed from premium 304 stainless steel, it offers exceptional durability and corrosion resistance for long-term outdoor use. This bracket is engineered for seamless compatibility with FHA or PA tension clamps, ensuring a stable and secure installation on various structures.

## Technical Specifications

Type	Failure Load (kN)	Pack (pcs)
CAB25	2.0	150x4

Technical data including failure load and packaging specifications for the CAB25 bracket.

### Failure Load

**2 kN**  
Failure Load

### Model Type

CAB25

## Material & Construction

**Material Grade**  
304 Stainless Steel

**Environmental Resistance**

Corrosion Resistant, Outdoor Rated, Weatherproof

## Application

### Intended Application

- Service lines anchoring
- Electrical power transmission
- Distribution systems
- Pole or structure mounting

**Compatible Clamps**

FHA Tension Clamps, PA Tension Clamps

## Logistics

**Standard Packaging**

150 x 4 pieces per pack
