

Stainless Steel Check Valve

This check valve is designed for general chemical and industrial services. The valve is suitable for use with water, oil, and gas at a working pressure of 1.6MPa (200PSI).

Overview

Industrial Stainless Steel Check Valve

This high-performance check valve is engineered for general chemical and industrial applications, providing reliable flow control for water, oil, and gas systems. Manufactured to rigorous ANSI B 16.34 standards and tested according to API 598, it ensures durability and safety in demanding environments. Available in various stainless steel grades including CF8, CF8M, and CF3M, this valve is built to withstand a working pressure of up to 1.6MPa (200PSI).

Technical Specifications

Working Pressure

1.6 MPa

Working Pressure

200 PSI

Working Pressure

Compliance Standards

- Design: ANSI B 16.34
- Testing: API 598

Body Materials

CF8, CF8M, CF3M

Applicable Media

Water, Oil, Gas

Dimensions

Size and Dimensions

Size	d (mm)	L (mm)	H (mm)
1/2"	15	65.5	107
